EDUCATION

University of Waterloo

Bachelor of Applied Science, Computer Engineering (Co-op)

Waterloo, ON

Sept. 2026 – Apr. 2031

Institute for Quantum Computing, University of Waterloo

Quantum School for Young Students (QSYS)

Waterloo, ON

Summer 2025

EXPERIENCE

Ascendance Foundry

Forward Deployed Engineer Intern

Toronto, ON (Hybrid)

June 2026 – Aug. 2026

- Built and shipped CoachBot, an internal Claude Code plugin onboarding **20+ fellows** in future cohorts.
- Architected a **five-agent** pipeline separating planning, execution, test design, test runs, and docs.
- Split test design from test execution across agents with disjoint permissions, so neither can force a pass.
- Implemented GitHub-backed auto-updates and per-user personalization that survives version bumps.
- Automated contract generation in Apps Script, cutting drafting **from an hour to under two minutes**.

Twin Brothers Wholesale

Data Analyst

Lansing, MI

Dec. 2025 – Jan. 2026

- Analyzed consumer purchasing patterns in Python and Pandas to support inventory optimization.
- Delivered demand-forecasting recommendations for operations processing **\$30K per day**.
- Reduced stock imbalances by identifying recurring trend signals in historical sales data.

Century 21

Real Estate Marketing Intern

Brampton, ON

July 2025 – Aug. 2025

- Analyzed sales and listing data in Excel to identify buyer segments; ran **50+ cold calls daily**.
- Recommended prioritizing listings near schools after identifying a family-oriented buyer segment.

PROJECTS

Skills Ontario Competition Robot | C++, Motor Control, Sensor Integration

2024 – 2026

- Built drivetrain and autonomous sensor logic for a motorized-claw robot; placed **5th provincially**.

Autonomous Line-Following Robot | Arduino, C++, IR & Ultrasonic Sensors

2025

- Fused IR line detection with ultrasonic ranging for path selection and obstacle avoidance.

6-DOF Robotic Arm | Arduino, Servo Control, Potentiometers

2024

- Built a six-degree-of-freedom arm with calibrated torque distribution and motion constraints.

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, JavaScript, Google Apps Script

Tools: Pandas, NumPy, React, Git/GitHub, Claude Code, Excel, Arduino, SolidWorks

Concepts: Multi-agent systems, LLM tooling, workflow automation, embedded systems, data analysis

LEADERSHIP

DECA Ontario

Chapter President

Brampton, ON

June 2025 – June 2026

- Led a **200+ member** chapter; built training resources and trained the executive team.
- Raised **\$3.1K** through fundraisers to reduce financial barriers to competition.

AWARDS

DECA Provincial Champion, Financial Trading & Decision Making — ICDC Qualifier

Skills Ontario Robotics — 5th Place; Peel Skills — 2nd Place

Fermat Math Contest — Top 13% Globally, School Champion; Canadian Senior Math Contest — Top 15%
